To Whom It May Concern:

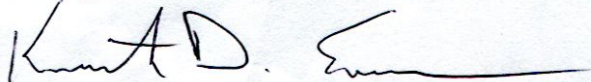

Edward Mentee has worked for me for over a year on a large complex contract supporting several applications at the USDA. Edward has performed maintenance on existing applications as well as new development. The new contract was won by another prime vendor.

Edward is an outstanding team member. His technical skills are outstanding. He is self-motivated and very detail oriented. He is the kind of programmer I can give a complex assignment and he will work at it until he finds the best solution.

As part of his duties, Edward worked on several different applications, sometimes switching back and forth on the same day. Edward is flexible and self-motivated. He handled all assigned tasks quickly and efficiently. He maintains a smile and good humor even when things are stressful and difficult.

If you would like additional information about Edward, you can telephone me at (913) 669-5924.

Sincerely,

A handwritten signature in black ink, appearing to read "Ken AD" followed by a long horizontal flourish.
